## Piercing & Tattoo

### Pierced party pocket guide

#### General advice

- The healing piercing is a wound, treat it as such!
- Be careful to not get caught on the jewelry when dancing or hugging
- Don't change your jewelry on the go
- Ask consent before touching other peoples piercings!

#### Oral piercings

- During healing, avoid sharing drinks and cigarettes, french kissing and oral sex
- Be careful with synthetic drugs (ecstasy/MDMA, speed, cocaine), the increased jaw movement can damage your piercing!

# TITANEN

## Piercing & Tattoo

### Nose piercings

- During healing, avoid sniffing chemical substances (speed, cocaine, ketamine)

### Genital piercings

- During healing, always use barrier protection!
- Listen to your body, if anything hurts, swells or bleeds, stop and give it time
- If both partners are pierced, make sure that your jewelry can't get snagged
